

Setting up email alias in Gmail

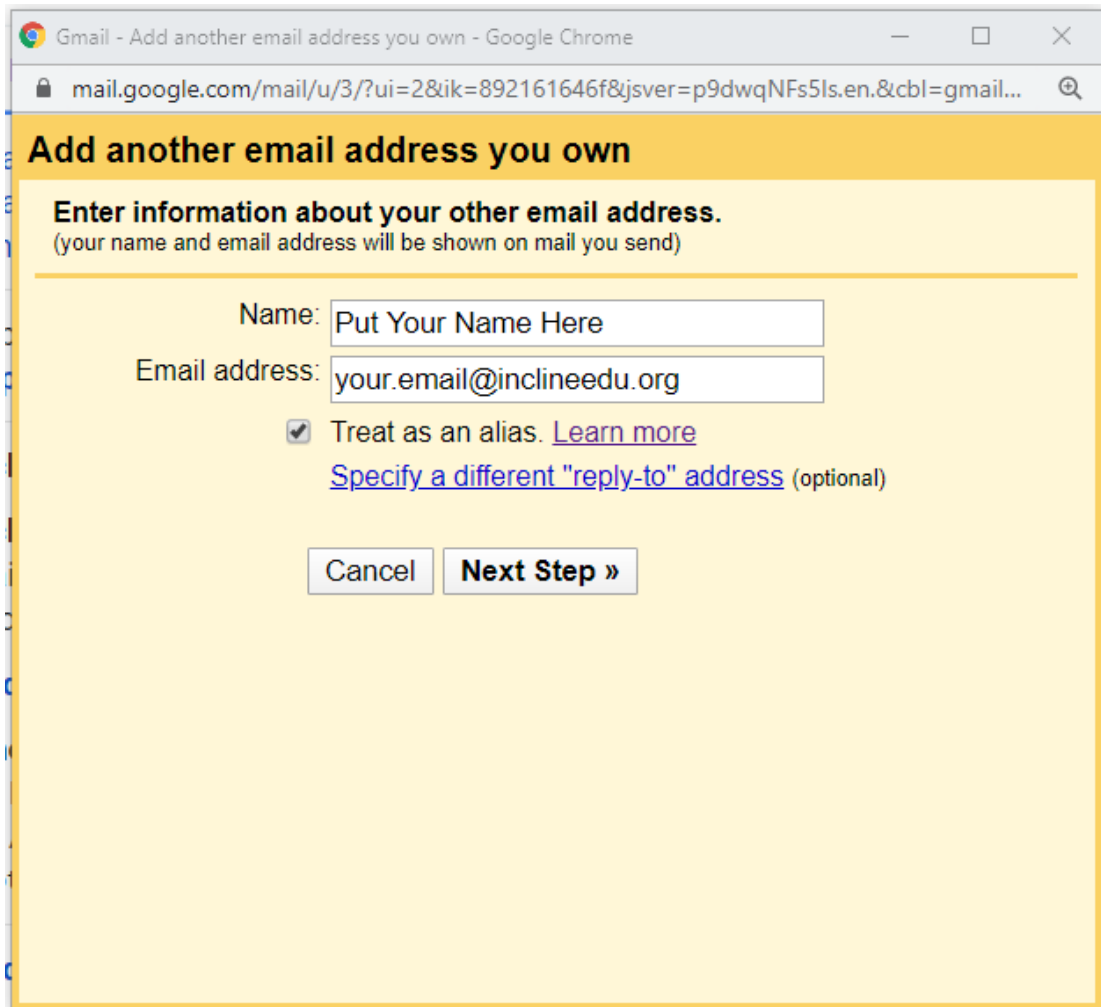

1. Log into Gmail with the forwarding address provided
2. Click cog button in top right corner of page, then click settings

3. Under "Accounts and Import", click "Add another email address"

4. In the new window, **type your name in the “name” form, and your @inlinedu.org email in the “email address” form.** Keep “Treat as an alias” checked, and click “Next Step”

The screenshot shows a web browser window with the title 'Gmail - Add another email address you own - Google Chrome'. The address bar shows the URL 'mail.google.com/mail/u/3/?ui=2&ik=892161646f&jsver=p9dwqNFs5ls.en.&cbl=gmail...'. The main content area has a yellow header with the text 'Add another email address you own'. Below this is a section titled 'Enter information about your other email address.' with a subtext '(your name and email address will be shown on mail you send)'. The form contains two input fields: 'Name:' with the placeholder text 'Put Your Name Here' and 'Email address:' with the placeholder text 'your.email@inlinedu.org'. Below these fields is a checkbox labeled 'Treat as an alias.' which is checked, followed by a link 'Learn more'. Below that is a link 'Specify a different "reply-to" address' with the text '(optional)' in parentheses. At the bottom of the form are two buttons: 'Cancel' and 'Next Step »'.

Gmail - Add another email address you own - Google Chrome

mail.google.com/mail/u/3/?ui=2&ik=892161646f&jsver=p9dwqNFs5ls.en.&cbl=gmail...

Add another email address you own

Enter information about your other email address.
(your name and email address will be shown on mail you send)

Name:

Email address:

☒ Treat as an alias. [Learn more](#)

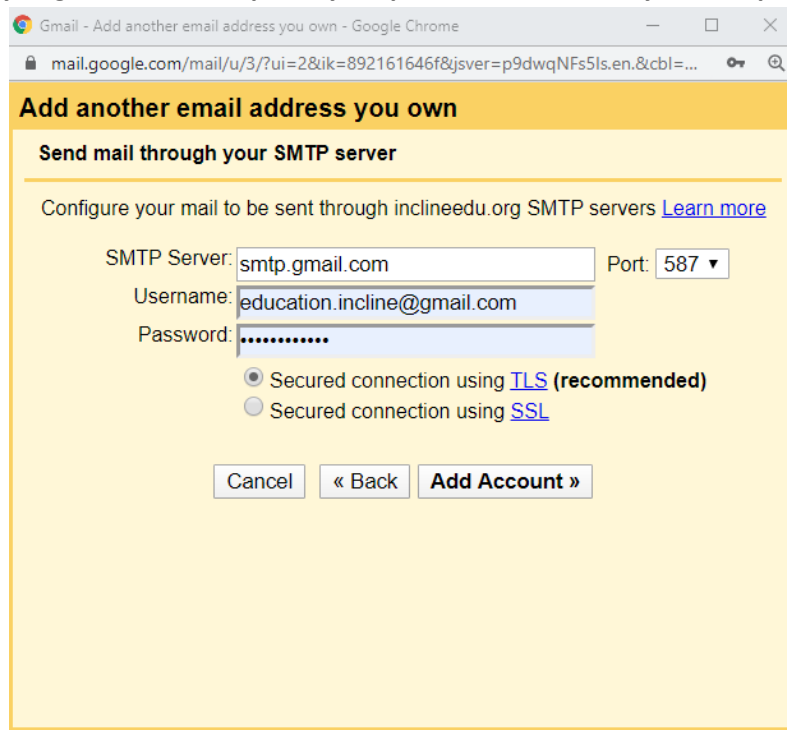

[Specify a different "reply-to" address](#) (optional)

5. If you have multi-factor authentication enabled, follow [this](#) guide to create an application specific password. Otherwise, proceed to step 6.

6. In the next window, type **smtp.gmail.com** in the “SMTP Server” form, and your **personal Gmail login details** in “Username” and “Password”. Make sure that “secured using TLS is enabled, and click “Add Account”

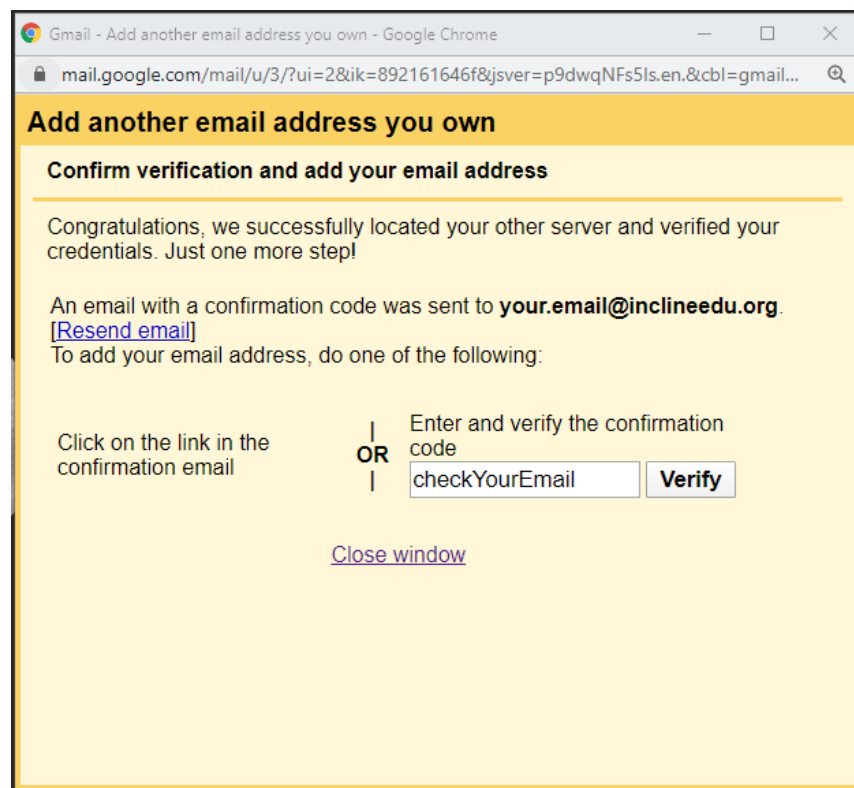

note: your username is your personal Gmail email.

note2: if you have multi-factor authentication enabled, paste the application specific password you generated in step 5 as your password instead of your real password.

The screenshot shows a web browser window titled "Gmail - Add another email address you own - Google Chrome". The address bar shows a URL from mail.google.com. The page has a yellow header with the title "Add another email address you own". Below the header, there's a section titled "Send mail through your SMTP server". A sub-header says "Configure your mail to be sent through inlinedu.org SMTP servers" with a "Learn more" link. The form contains three input fields: "SMTP Server" with "smtp.gmail.com", "Port" with a dropdown set to "587", "Username" with "education.incline@gmail.com", and "Password" with masked characters. Below these fields are two radio buttons: "Secured connection using TLS (recommended)" (which is selected) and "Secured connection using SSL". At the bottom are three buttons: "Cancel", "« Back", and "Add Account »".

7. Check your email for an email from Google with your confirmation code, and click the link in the email, or enter your code in the corresponding input box.

The screenshot shows the same web browser window, but the page content has changed. The yellow header remains. The section title is now "Confirm verification and add your email address". The text says "Congratulations, we successfully located your other server and verified your credentials. Just one more step!". Below this, it says "An email with a confirmation code was sent to your.email@inlinedu.org." with a "[Resend email]" link. Then it says "To add your email address, do one of the following:". There are two options: "Click on the link in the confirmation email" and "Enter and verify the confirmation code". The second option is selected, and it includes an input field with "checkYourEmail" and a "Verify" button. At the bottom is a "Close window" link.
